CONTENTS

FARMERS' BULLETIN NO. 1376.—NATURAL AND ARTIFICIAL BROODING OF CHICKENS: Page

Rearing chickens with hens 1
Brood coops 3
Confine the mother hen 4
Care of the brood coop 5
Artificial brooding 6
Hovers, brooders, and brooding systems 7
Individual hovers and brooders 8
Hot-water-pipe brooders 9
Methods of heating 10
Fireless brooders 10
Correct temperatures for brooding 11
Care of purchased day-old chicks 12
Feeding young chickens 12
Toe punching and banding 15
Farmers' Bulletins relating to poultry 16

FARMERS' BULLETIN NO. 1377.—MARKETING POULTRY:

Where poultry is produced 1
The problem of transportation 2
Seasonal production 3
The part cold-storage plays 3
Methods of marketing 5
Market channels for poultry 5
Market grades and quotations 6
Marketing poultry alive 9
Finishing or fattening poultry 13
Killing and dressing poultry 17
Grading and packing 25
Shipping dressed poultry 27
Commercial storage of dressed poultry 28
Points for the producer to remember 29

FARMERS' BULLETIN NO. 1378.—MARKETING EGGS:

Where eggs are produced 1
The problem of transportation 3
Seasonal production 3
The function of cold storage 4
Marketing methods 6
Market channels 6
Egg structure and composition 8
Factors affecting quality 10
Farm care essential to good quality 12
Candling 12
Grading 16
Commercial grades 17
Egg packages 19
Packing eggs 22
Shipping eggs 24
Preservation and cold-storage of eggs 26
Points for the producer to remember in marketing eggs 28

FARMERS' BULLETIN NO. 1379.—BEEF PRODUCTION IN THE COTTON BELT:

Raising beef cattle in the cotton-growing States 1
Shelter and equipment 3
Water supply 3
Silos for storing succulent feeds 4
Improving the breeding herd 4
Systems of handling cattle for beef 7

76509E—27

FARMERS' BULLETIN No. 1379.—BEEF PRODUCTION IN THE COTTON BELT—Continued. Page
Handling and feeding cows 7
The calf at birth and after 9
Best age and condition at which to market cattle 9
Wintering calves as stockers 9
Fattening calves 11
Fattening steers 12
Hogs following cattle 12
Cottonseed meal for fattening 13
Velvet beans fatten steers satisfactorily 13
Roughages 13
Increase the feed gradually 14
Full feed rations for fattening steers 14
Pasture is the cheapest feed 15
Items of cost in fattening steers 15
Shrinkage and shipping to market 16
Saving manure for greater returns 17
Apparent losses versus real progress 17
Farmers' bulletins relating to beef production 18
FARMERS' BULLETIN No. 1380.—APPLE SCALD AND ITS CONTROL:
Introduction 1
Appearance and characteristics of scald 1
Effect of orchard conditions 2
Maturity of the fruit 2
Soil moisture 3
Size of the apples 3
Effect of packing-house, transportation, and storage conditions 3
Temperature 3
Delayed storage 4
Aeration and ventilation 4
Oiled wrappers 9
Oils and waxes 12
Critical periods in scald control 14
After-storage behavior of apples 15
Losses from scald 15
Summary 16
FARMERS' BULLETIN No. 1381.—HERBACEOUS PERENNIALS:
Hardy perennial plants 1
Use of herbaceous perennials 4
Arrangement 6
Culture 16
Gardens and borders 16
Beds among shrubbery 18
Naturalized plantings 19
Rock gardens 19
Wall gardens 19
Wild gardens 19
Propagation 20
Kinds to use 24
Regions with similar growing conditions 74
Adaptability of different kinds of plants 83
Index of common names 88
FARMERS' BULLETIN No. 1382.—FATTENING STEERS IN THE CORN BELT:
I. Feeder cattle 1
The feeder supply 1
Purchasing feeders 1
Selecting feeders 4
II. Fattening steers 5
Getting steers on full feed 6
Methods of dry-lot feeding 7
Corn and legume-hay ration 7
Silage rations 8
Factors to consider in preparing rations 11
Utilizing grass in the fattening ration 12
Grain and hay rations with pasture 12
Grain, hay, and silage rations with pasture 14
Important miscellaneous factors 16

FARMERS' BULLETIN NO. 1383.—FOOD VALUES AND BODY NEEDS SHOWN GRAPHICALLY:

	Page
What the charts show	1
Arrangement of the charts	4
Group I. Vegetables and fruits	4
Group II. Efficient-protein foods	5
Group III. Cereal and cereal preparations	6
Group IV. Sugar and sugary foods	7
Group V. Fats and fat foods	8
Miscellaneous dishes	8
Description of the charts	9
Uses of the charts	34
Vitamins	34

FARMERS' BULLETIN NO. 1384.—COMMUNITY COTTON PRODUCTION:

The need of supplies of pure seed	1
Importance of uniformity in cotton	3
Magnitude of the pure-seed requirement	4
Mixing of seed at public gins	5
Causes of "running out" of cotton varieties	6
Saving in costs of pure seed	7
Commercial advantages of a uniform product	7
Greater efficiency in production	8
Cultural improvements in organized communities	8
Organization problems of community production	9
Necessity of holding to one variety	10
Gins as community centers	12
Developing community seed supplies	12
Choice of a community variety	14
Factors in judging varieties	15
Cooperation with one-variety communities to develop supplies of pure seed	17

FARMERS' BULLETIN NO. 1385.—BUYING A FARM IN AN UNDEVELOPED REGION:

Introduction	1
Capital needed	1
Important considerations in purchasing	6
Valuation	6
Initial payment	7
Partial payments	15
Sources of credit	19
Land-settlement companies	20
State credit	21
Federal land banks	21
Second mortgages	25
Advantages of acquiring information and experience	28
Appendix	30

FARMERS' BULLETIN NO. 1386.—TERRACING FARM LANDS:

Causes and forms of erosion	3
Methods of preventing erosion	4
Terracing	5
The ridge terrace	6
Terrace outlets	14
Laying off terraces	15
Building terraces	18
Care and cultivation of terraces	21

FARMERS' BULLETIN NO. 1387.—LAWS RELATING TO FUR ANIMALS FOR THE SEASON 1923–24:

Legislation of 1923	1
Summary of laws	5
Federal laws	5
Laws of States	5
Laws of Canada	26
Laws of Newfoundland	31
Laws of Lower California	31
Officials from whom copies of laws may be obtained	32
Publications relating to fur animals	33

FARMERS' BULLETIN No. 1388.—RURAL PLANNING: THE SOCIAL ASPECTS OF RECREATION PLACES: Page
Must rural communities depend on cities for their recreation 1
Rural parks 2
Rural athletic fields 10
Rural picnic grounds 17
Rural public reserves 20
Farm colonization plans 25
Human factor to be considered 30
FARMERS' BULLETIN No. 1389.—SORGO-SIRUP MANUFACTURE:
Use of sorgo for sirup 1
Varieties of sorgo 2
Culture of sorgo 4
Manufacture of sorgo sirup 7
Extracting the juice 7
Settling the juice 10
Clarifying the juice 11
Evaporation or concentration 14
Treatment of finished sirup 19
Canning sirup 20
Prevention of crystallization 20
Economic considerations 21
Composition of sorgo 26
Production of sorgo sirup 26
FARMERS' BULLETIN No. 1390.—VEGETABLE SEEDS FOR THE HOME AND MARKET GARDEN:
Should gardeners grow their seed 1
Advantages of home seed growing 1
Marketing home-saved seed 2
Vegetables classified for seed-growing purposes 2
Plants which bear seed the year they are planted (annuals) 3
Plants which require a winter rest before producing seed (biennials) 7
Perennial vegetables 12
Labeling, fumigating, and storing vegetable seeds 13
Duration of viability of seeds 14
FARMERS' BULLETIN No. 1391.—THE GUINEA FOWL:
Demand for guinea fowl in the United States 1
Price of guinea fowl 2
Breeding stock and eggs for hatching 2
Varieties of guinea fowl 2
Distinguishing sex 4
Breeding 5
Guinea eggs 6
Incubation 8
Artificial incubation and brooding 9
Natural brooding of guinea chicks 9
Feeding 10
Roosting 11
Marketing 11
FARMERS' BULLETIN No. 1392.—BLACK WALNUT FOR TIMBER AND NUTS:
Introduction 1
Range and supply 3
Where walnut grows best 3
Importance and uses 5
The wood 5
Value of the nuts 5
Value as an ornamental and memorial tree 5
Related species 8
Black walnut hybrids and their uses 9
Growing black walnut for timber 10
Where to plant 10
Planting the nuts 11
Storing seed nuts over winter 12
Growing and planting seedling trees 13
Close or regular planting 14
Care of planted trees 16
Growth and returns 18

FARMERS' BULLETIN No. 1392.—BLACK WALNUT FOR TIMBER AND NUTS—Continued. Page

Growing black walnut for nuts 21
The nut industry 21
Advisability of growing for nuts 22
Selecting the seed 23
Seedlings versus budded or grafted trees 24
Instructions for orchard planting 25
Handling the nuts 26
Varieties 27
Sources of information and planting stock 30

FARMERS' BULLETIN No. 1393.—PRINCIPLES OF DAIRY-BARN VENTILATION:

The need for ventilation 1
The purpose of a ventilation system 1
Factors which affect barn ventilation 4
Animals source of heat 9
Ventilation systems 10
Construction 14
Operation 20

FARMERS' BULLETIN No. 1394.—WATERMELONS:

Distribution of the commercial watermelon industry 1
Types of soils adapted for growing watermelons 3
Crop rotation 3
Preparation of the land 4
Manure and fertilizers 4
Varieties of watermelons for shipping and for home use 6
Good seed, its importance and how obtained 7
Planting dates and methods of planting 9
Insect enemies of the watermelon 10
Cultivation 12
"Pruning" 12
Diseases of the watermelon 13
Gathering and loading watermelons 17
Factors governing the cost of growing watermelons 21
Yields per acre and returns 21
Summary 21

FARMERS' BULLETIN No. 1395.—BEEF-CATTLE PRODUCTION IN THE RANGE AREA:

The range area and its subdivisions 1
National-forest and public-land areas 7
Native western forage plants 8
Number of beef cattle in the range area 8
Choice and improvement of ranching property 9
Carrying capacity and improvement of ranges 18
Selection of breeding cows 21
Selection of range bulls 23
Management of the breeding herd 24
Handling cattle on the range 26
Handling cattle in winter 33
Feeding for fattening 37
The production of pure-bred cattle 38
Prevention of losses from poisonous plants 42
Cattle parasites in the range area 42
Diseases common in the range area 43

FARMERS' BULLETIN No. 1396.—THE DASHEEN; A SOUTHERN ROOT CROP FOR HOME USE AND MARKET:

What the dasheen is 1
General description of the dasheen 2
Chemical composition and digestibility 4
History of the introduction of the dasheen 7
Varieties 8
Cultivation 10
Fertilizers 13
Harvesting 14
Storage 17
Marketing 18
Diseases and insect enemies 22
Uses 25

FARMERS' BULLETIN No. 1397.—MOUSE CONTROL IN FIELD AND ORCHARD: Page

Introduction 1
Meadow mice and pine mice compared 1
Field-mouse injury 4
Removal of mouse shelter 6
Using repellent washes 6
Mechanical protection 7
Destruction of field mice 8
Trapping 9
Poisoning 9
Natural enemies of mice 13
Care of injured trees 14
Cooperation in mouse control 14

FARMERS' BULLETIN No. 1398.—CURRANTS AND GOOSEBERRIES: THEIR CULTURE AND RELATION TO WHITE-PINE BLISTER RUST:

Regions where currants and gooseberries can be grown 1
Soil and site for a plantation 2
Preparation of the soil 2
Propagation of the plants 3
Handling nursery stock 5
Time to plant 5
Distance to plant 5
Directions for planting 6
Tillage and mulching 7
Interplanting and intercropping 8
Maintenance of fertility 10
Pruning the bushes 11
Injurious insects 13
Diseases 16
White-pine blister rust 18
Spray schedule for insects and diseases 23
Duration of a plantation 24
Harvesting the crop 24
Yields of fruit 26
Varieties 27
Ways of using the fruit 30
Summary of State laws concerning currants and gooseberries in relation to blister-rust control 33
Federal and State quarantine regulations governing the movement of currant and gooseberry plants 36

FARMERS' BULLETIN No. 1399.—BLACKBERRY GROWING:

Location of the plantation 2
Soils 3
Preparation of the soil 3
Propagation 4
Pollination 4
Planting 4
Crops between rows 5
Cultivation 5
Fertilizers 6
Training the plants 6
Mulching 10
Harvesting 10
Yields 12
Winter protection 12
Productive life of the plantation 13
Insects and diseases 13
Where different varieties do best 13
Characteristics of varieties 14
Hybrids and novelties 16
Blackberry by-products 17

FARMERS' BULLETIN NO. 1400.—ESTABLISHING CRANBERRY FIELDS: Page

Requirements of cranberry growing 2
Botanical relationships of the cranberry 4
Characteristics of the cranberry 5
Choosing the site 12
Clearing the swamp 15
Ditching and draining 19
Reservoirs and water supply 20
Pumps 22
Dams or dikes 23
Head gates 25
Leveling 26
Sanding 27
Varieties 29
Propagation 32
Planting 32
Care of a newly set plantation 34
